

## Gradle set up for Jenkins

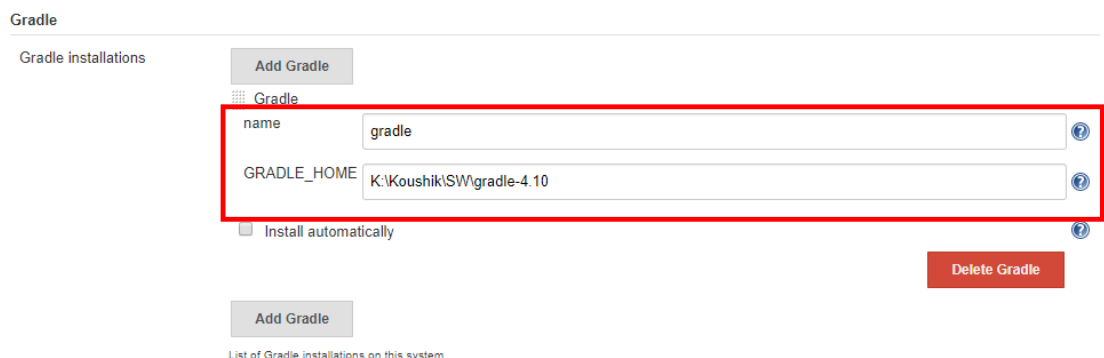

- 1) Click on the link <https://gradle.org/releases/>
- 2) Scroll down and click on the latest version Download: [binary-only](#)

- 3) Once download is complete extract in any drive and copy the path

- 4) Copy the root path (don't copy the bin path)
- 5) Set the path in system environment (same as you did for Git and Java)
- 6) Now run Jenkins
- 7) Click on [Manage Jenkins](#)
- 8) Click on Global Tool Configuration
- 9) Click on Gradle Installation and paste the path

- 10) That's it.
